

Industrial visit to Dalhousie

From April 25th to April 29th, 2023, the Department of Management, Commerce, and CSA at Baba Mastnath University organized an industrial visit to Dalhousie. The event was spearheaded by the Faculty of Management & Commerce under the guidance of the convener, Dr. Anil Kanwa, and co-convener, Dr. Abhishek. This five-day visit saw active participation from 36 students, providing them with a valuable opportunity to engage with practical learning experiences beyond the classroom.

The industrial visit aimed to bridge the gap between theoretical knowledge and practical application, offering students insights into real-world industrial operations and management practices. During the visit, participants explored various industries and businesses operating in the Dalhousie region. They were introduced to operational processes, management strategies, and the role of innovation in business sustainability. The visit also included interactive sessions where students could directly engage with industry professionals, gaining a deeper understanding of industry-specific challenges and solutions.

Dr. Anil Kanwa emphasized the importance of experiential learning in his opening address, encouraging students to actively participate and absorb the knowledge shared during the visit. Dr. Abhishek, the co-convener, ensured the smooth execution of the program, fostering a collaborative and enriching environment for all attendees.

This industrial visit holds immense significance not just for the participating students but also from a broader societal perspective. By exposing students to the realities of industrial operations, the event nurtured their problem-solving skills, leadership abilities, and innovative thinking. Such experiential learning initiatives play a pivotal role in developing a workforce that is better equipped to address the complexities of modern industries.

Moreover, this event aligns closely with the United Nations Sustainable Development Goals (SDGs), particularly SDG 8 (Decent Work and Economic Growth) and SDG 4 (Quality Education). By fostering practical learning and encouraging students to explore sustainable practices within industries, the visit contributed to the development of future professionals who are mindful of economic growth, environmental sustainability, and social responsibility. These values, when instilled in young minds, have a cascading effect on society, promoting sustainable industrial development and informed decision-making.

The industrial visit witnessed enthusiastic participation from 36 students who represented the Management, Commerce, and CSA departments. Through their active engagement, students gained first-hand exposure to industry dynamics, business operations, and sustainability practices. The interactions with industry professionals not only enhanced their academic understanding but also inspired them to think critically about the evolving demands of the corporate world.

The event's impact was evident in the participants' feedback, which highlighted their appreciation for the practical insights and learning opportunities provided during the visit. Many students expressed their eagerness to apply the knowledge gained in their academic and professional endeavors, underscoring the success of the initiative.

The industrial visit to Dalhousie organized by Baba Mastnath University's Faculty of Management & Commerce was a significant step towards promoting experiential learning and fostering industry-academia collaboration. By exposing students to practical industry scenarios and encouraging them to think about sustainable solutions, the event reaffirmed the university's commitment to providing quality education and contributing to global sustainability goals. Such initiatives not only enhance the learning experience but also play a crucial role in shaping socially responsible and skilled professionals for the future.
